comfort for life

FACT

Copper Interpolated
Plush VISCO BREATHE sides

Nested Pocket

Foam Encased

Minimal Transfer

Electronically Tempered

Open cell technology

Imported Ticking

Hygienic & Non Toxic

Dual Sided

BENEFIT

The copper-infused mattress, with moisture-dispensing VISCO BREATHE blue gel and Hyper Soft polyurethane layers, enhances sleep quality by enhancing magnetic fields, regulating temperature, detoxifying through magnetic alignment, acting as a thermal conductor, and reducing inflammation.

The pockets springs are individually packed by hand in a honey comb configuration giving a 30% greater spring count and support.

The spring unit is encased in a high density firm polyurethane foam as a reinforced edge support and zero sag.

The Pocket Spring unit, being individually packed and glued together limits the movement transfer and your partner will not be disturbed if you toss and turn.

The pockets spring units are electronically tempered for more rigidity and to ensure a minimal compression set.

VISCO BREATHE blue gel is manufactured with an open cell structure which allows for ventilation ensuring an ultra hygienic sleep environment

The soft touch jacquard ticking is micro-quilted to ensure optimum heat dissipation.

All foams used in the manufacturing process are produced in-house at Strandfoam Group and is completely stable, non-toxic and Hygienic.

The BODY BALANCE offers the benefit of dual sleeping surfaces for prolonged comfort and support.
